

## **Evidence Mode (Evaluation)**

Evidence Without Authority

Legacy Lens provides an Evidence Mode license that enables evidence-only analysis.

This mode exists to inspect determinism and boundary handling without issuing governance decisions.

### **WHAT EVIDENCE MODE ALLOWS**

- run the authority analysis fully offline
- analyze source artifacts deterministically
- generate immutable evidence bundles
- inspect findings and boundary evidence
- verify bundles cryptographically

### **WHAT EVIDENCE MODE DOES NOT ALLOW**

- declare governance context
- issue GO / NO-GO / REFUSE outcomes
- generate board decision records or executive decision summaries
- reference outputs externally

These actions require a Decision Authority License issued under contract and declared scope.

### **EVIDENCE MODE REQUEST FLOW**

1. Request Evidence Mode access.
2. Confirm scope and intent.
3. Receive signed Evidence Mode license and offline kit instructions.
4. Run evidence-only analysis.
5. Review findings and determinism.

Evidence Mode demonstrates methodology.

Authority issues or refuses decisions under declared governance context.
