

## **Partner Enablement Insert (1**

Page)

This insert is designed for SI and Big-4 partners. It prevents over-claiming and preserves audit defensibility.

### **HOW TO POSITION LEGACY LENS (PARTNER USE)**

Say

- "Deterministic evidence"
- "Refusal when proof collapses"
- "Context-bound governance"

Do NOT say

- compliant
- secure
- safe
- verified runtime
- approved for production

### **WHAT LEGACY LENS DOES**

- proves what can be proven from source
- records what cannot be proven
- issues or refuses decisions conservatively

### **WHAT LEGACY LENS NEVER DOES**

- certify compliance
- infer runtime behavior
- replace audits or testing

### **WHY IT IS REQUIRED**

Using Legacy Lens is safer than proceeding without proof.
